User Authentication and Access Control:

1. User Authentication:
   - Implement secure user authentication for various user roles.

2. Role-based Access Control:
   - Define and enforce role-based access control to restrict functionalities based on user roles (e.g., admin, staff).

Services Management:

3. Service Catalog:
   - Maintain a comprehensive catalog of all services offered.

4. Pricing Calculation:
   - Develop a pricing calculation function to determine the cost of a selected service based on quantity.

Communication and Feedback:

5. Text Message System:
   - Implement a text message system for mass communication with customers.

6. Survey Module:
   - Incorporate a survey module to collect customer feedback through text messages.

Transaction Management:

7. Comment and Review:
   - Allow logged-in users to write comments or reviews for each transaction before recording.

8. Receipt Generation:
   - Generate receipts for transactions and associate them with the respective records.

9. Timestamps:
   - Display timestamps for each transaction to track the time of occurrence.

Supplier and Material Management:

10. Supplier Directory:
   - Maintain a directory of suppliers and their contact information for materials.

11. Customer Information:
   - Capture and store essential customer information.

Inventory Control:

12. Stock Consumption Check:
   - Verify every receipt detail against stock levels to monitor material consumption.

13. Low Stock Alerts:
   - Implement a notification system to alert users when stock levels for particular items are low.

Mobile Accessibility:

14. Mobile-friendly Interface:
   - Design a responsive and user-friendly interface for mobile access.

Security Measures:

15. Data Encryption:
   - Apply robust data encryption methods to secure sensitive information.

16. Regular Backups:
   - Establish a routine backup system to prevent data loss.

Scalability:

17. Scalability Planning:
   - Design the system architecture to accommodate business growth and increased data volumes.

Miscellaneous:

18. Time Display:
   - Include a feature to display the current time within the application.
